Application flow chart

Flow charts serve as a visual representation of how an application functions, making it easier to understand, analyze, and improve the process.

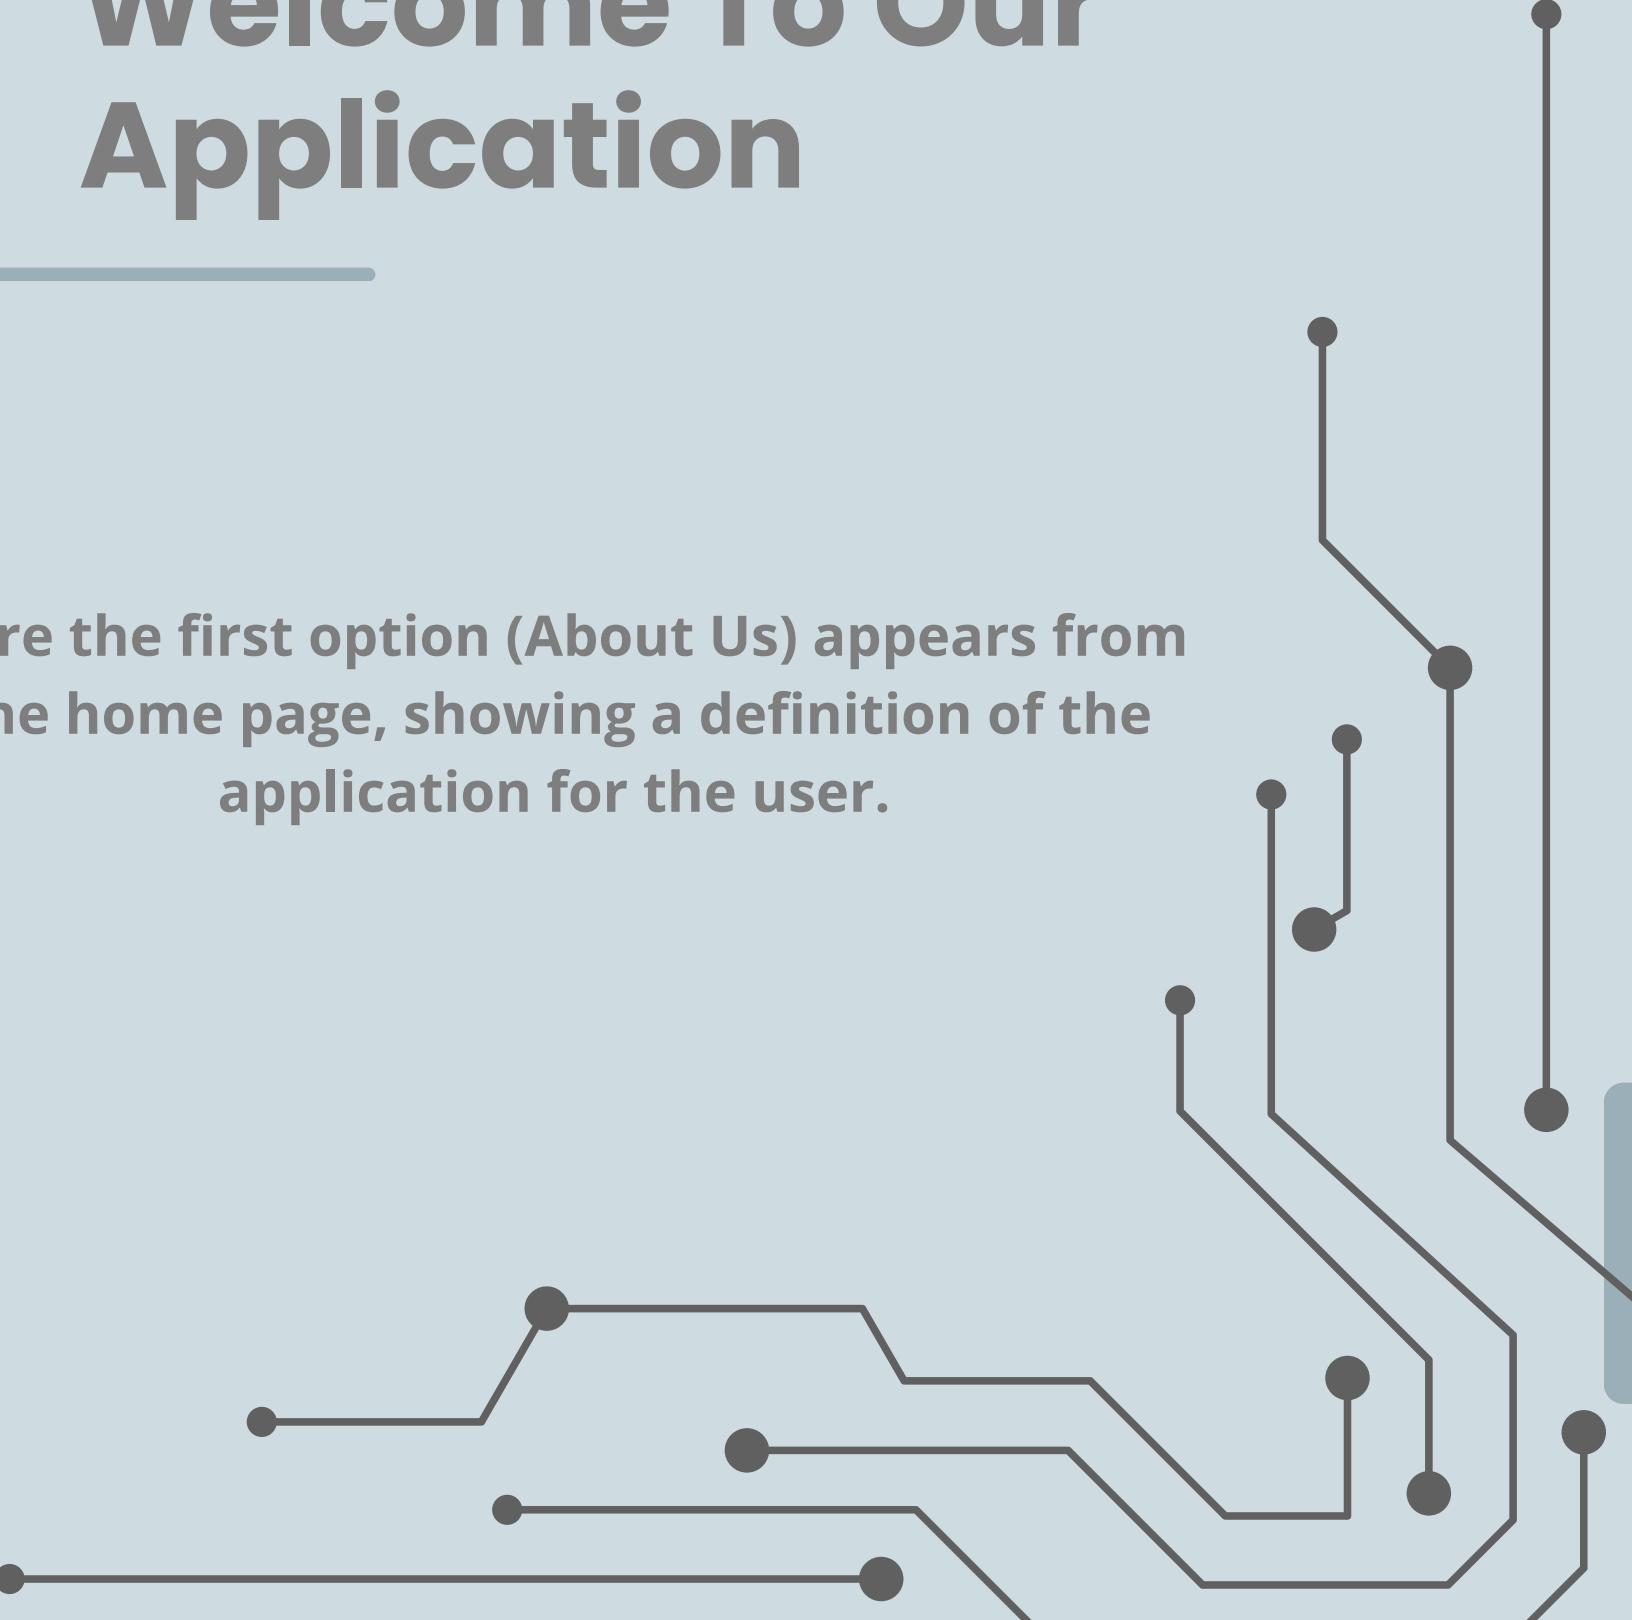

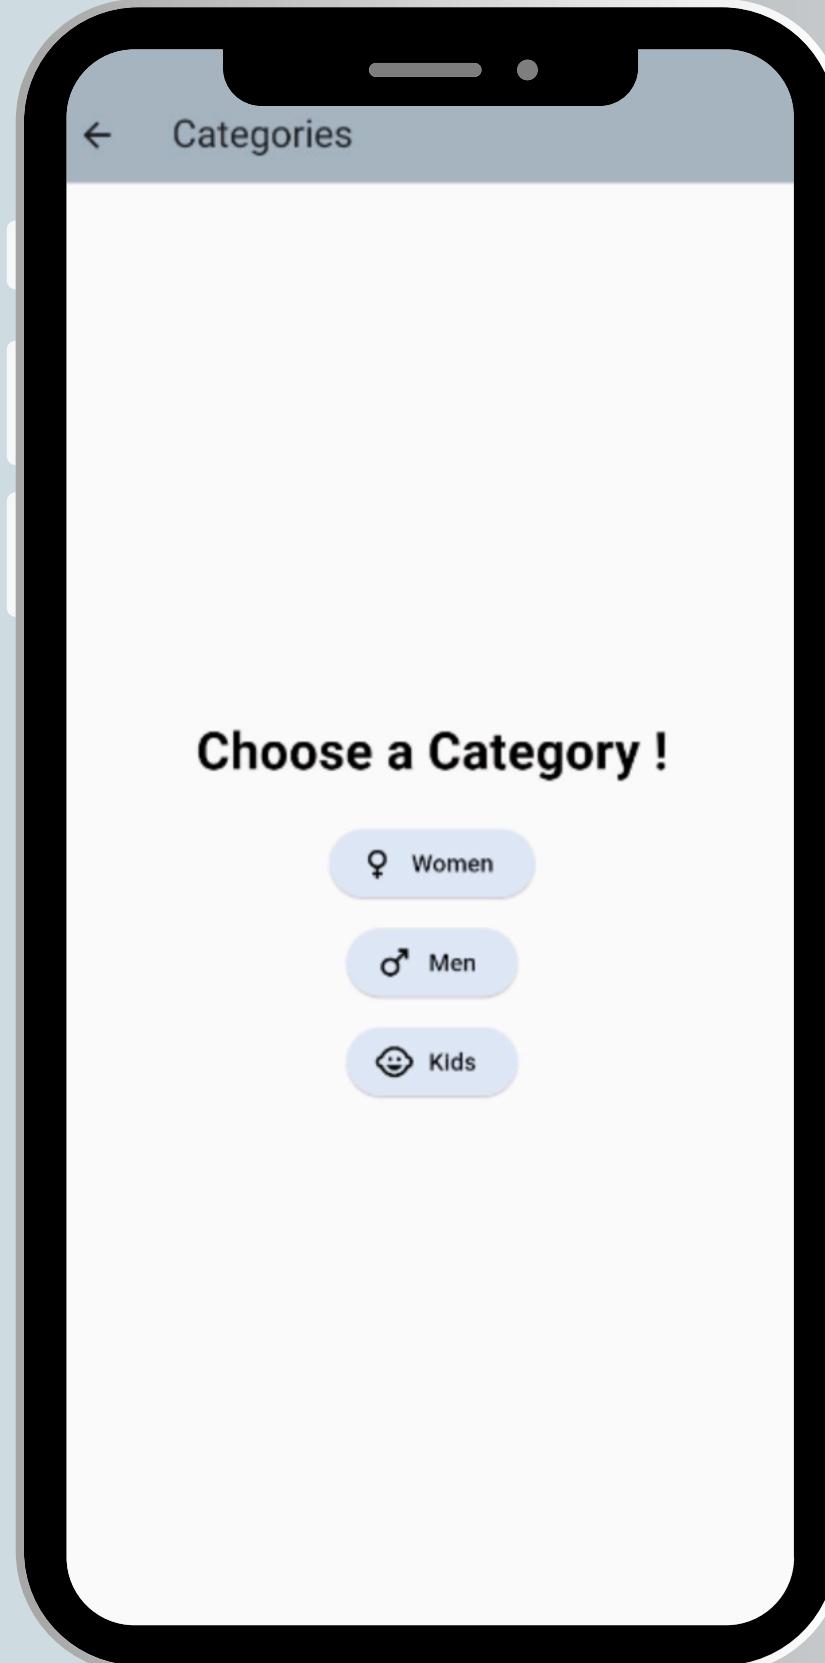

Welcome To Our Application

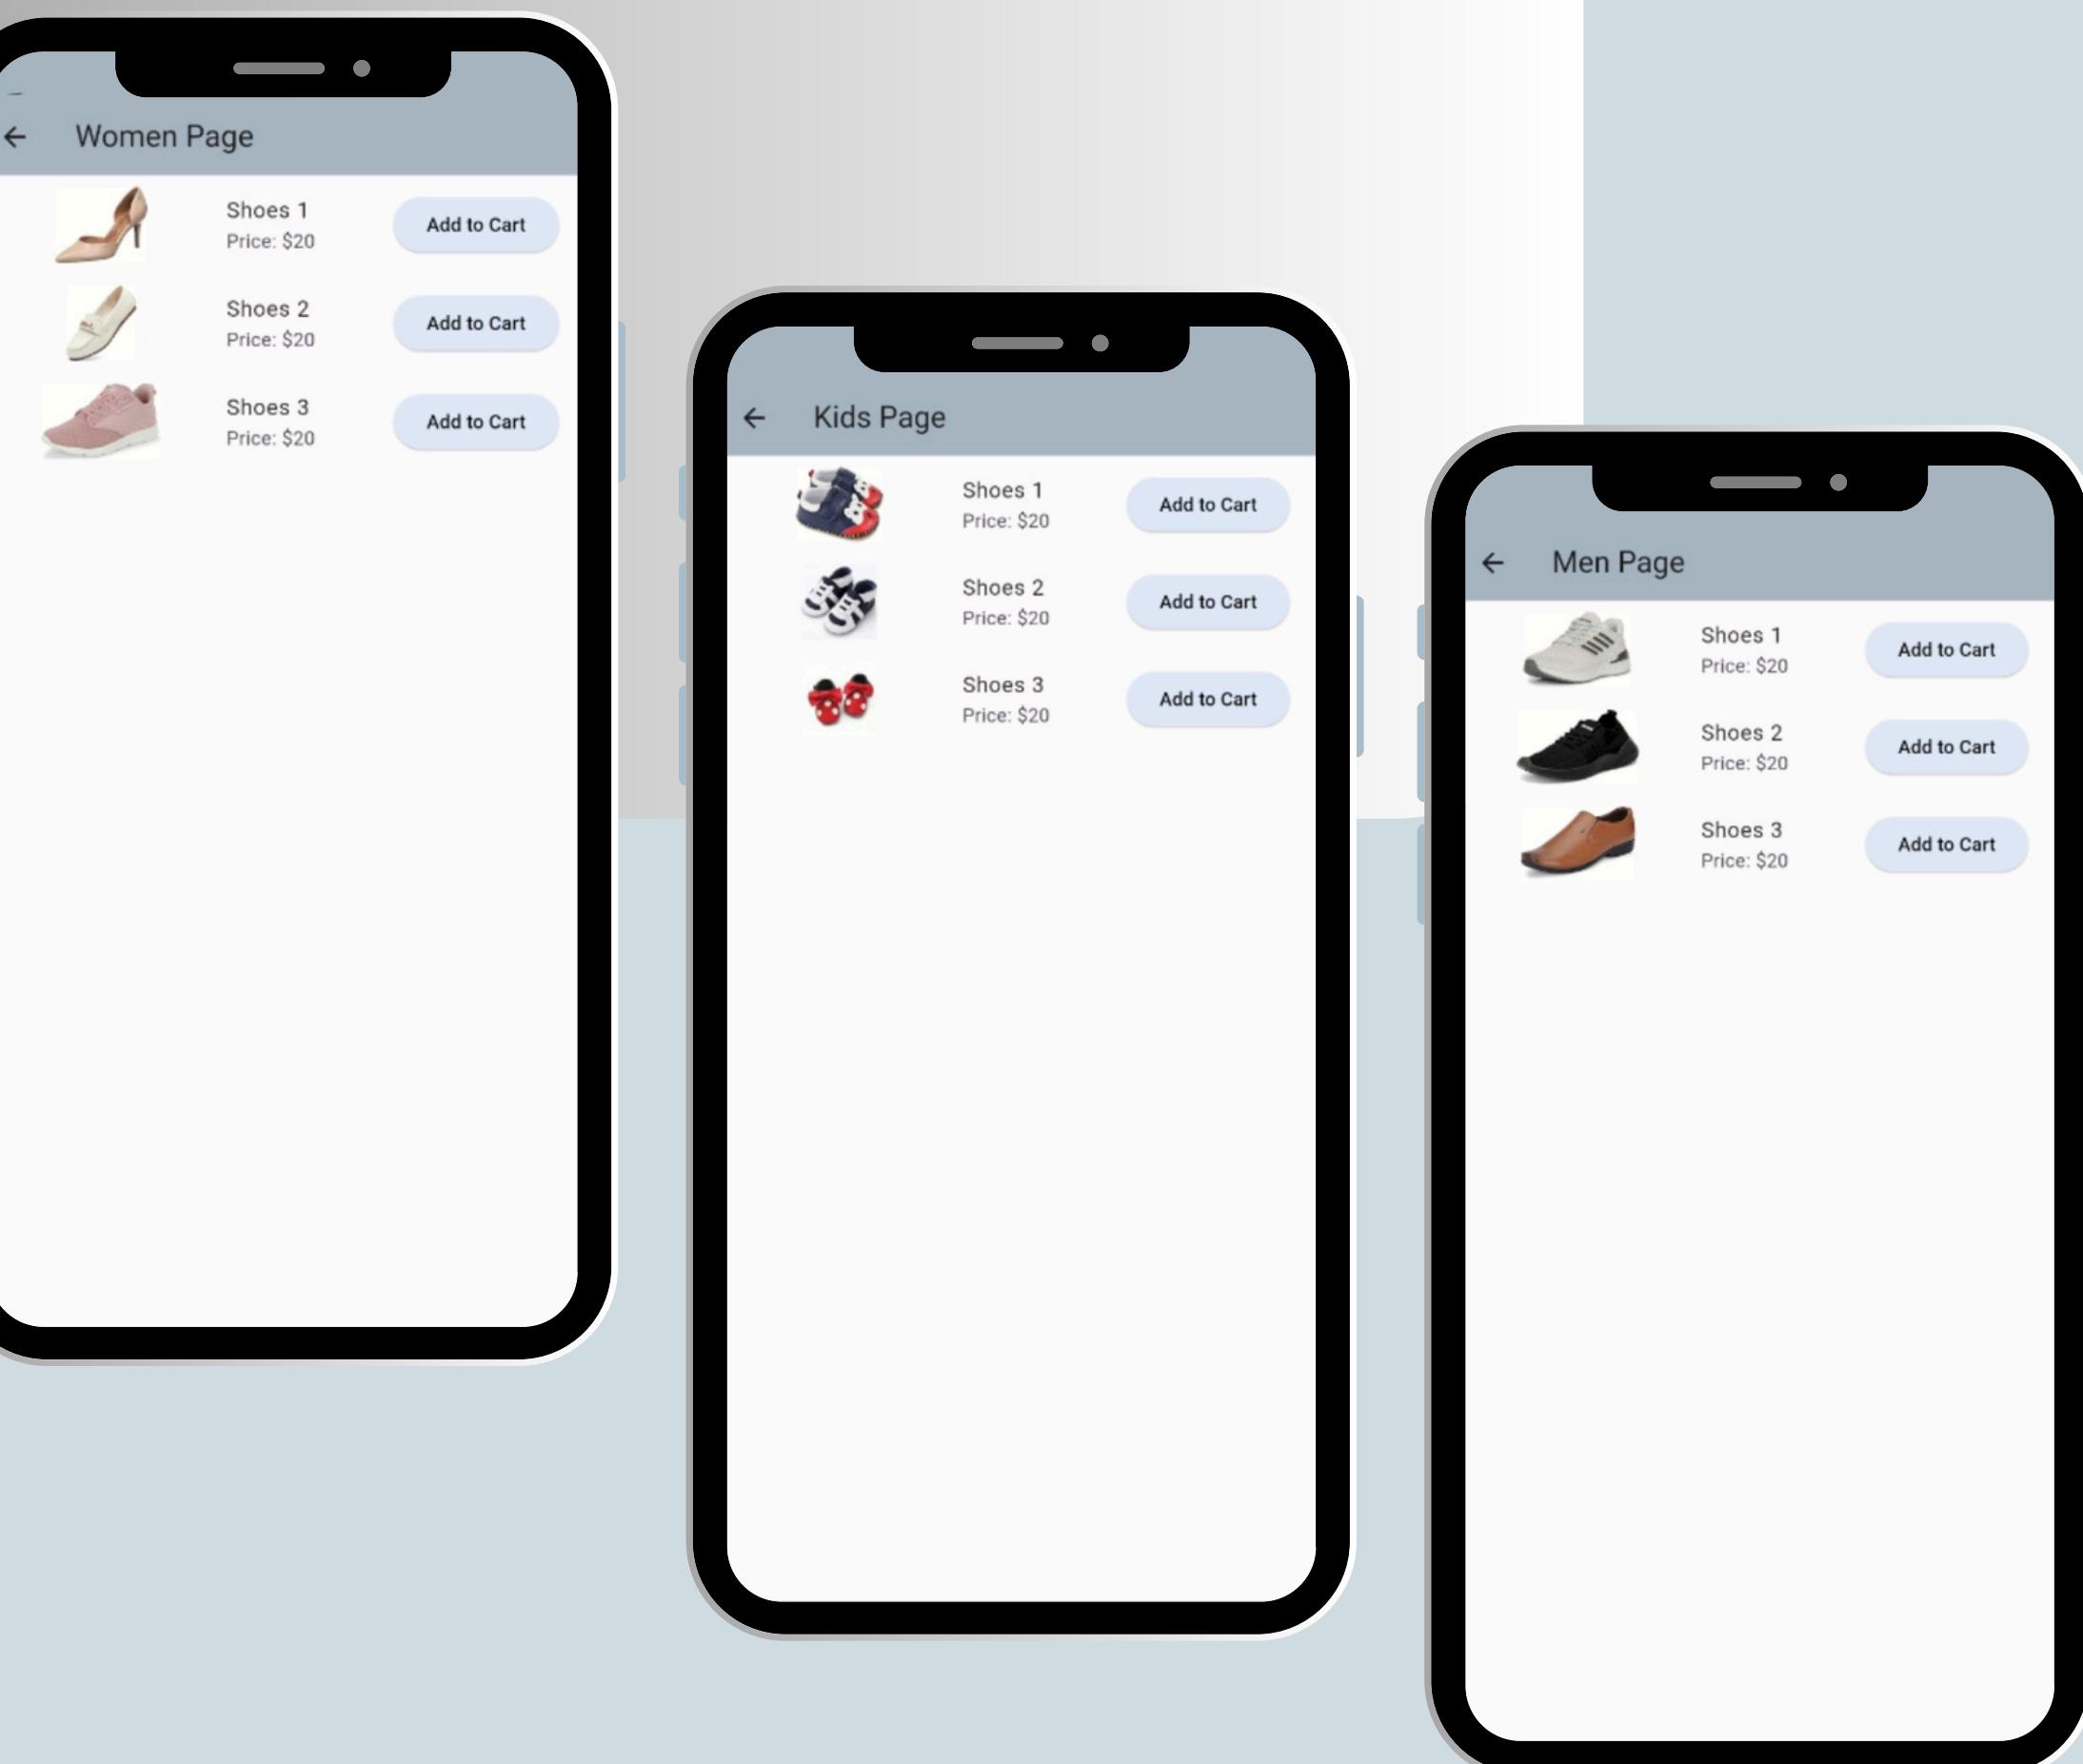

Here the first option (About Us) appears from the home page, showing a definition of the application for the user.

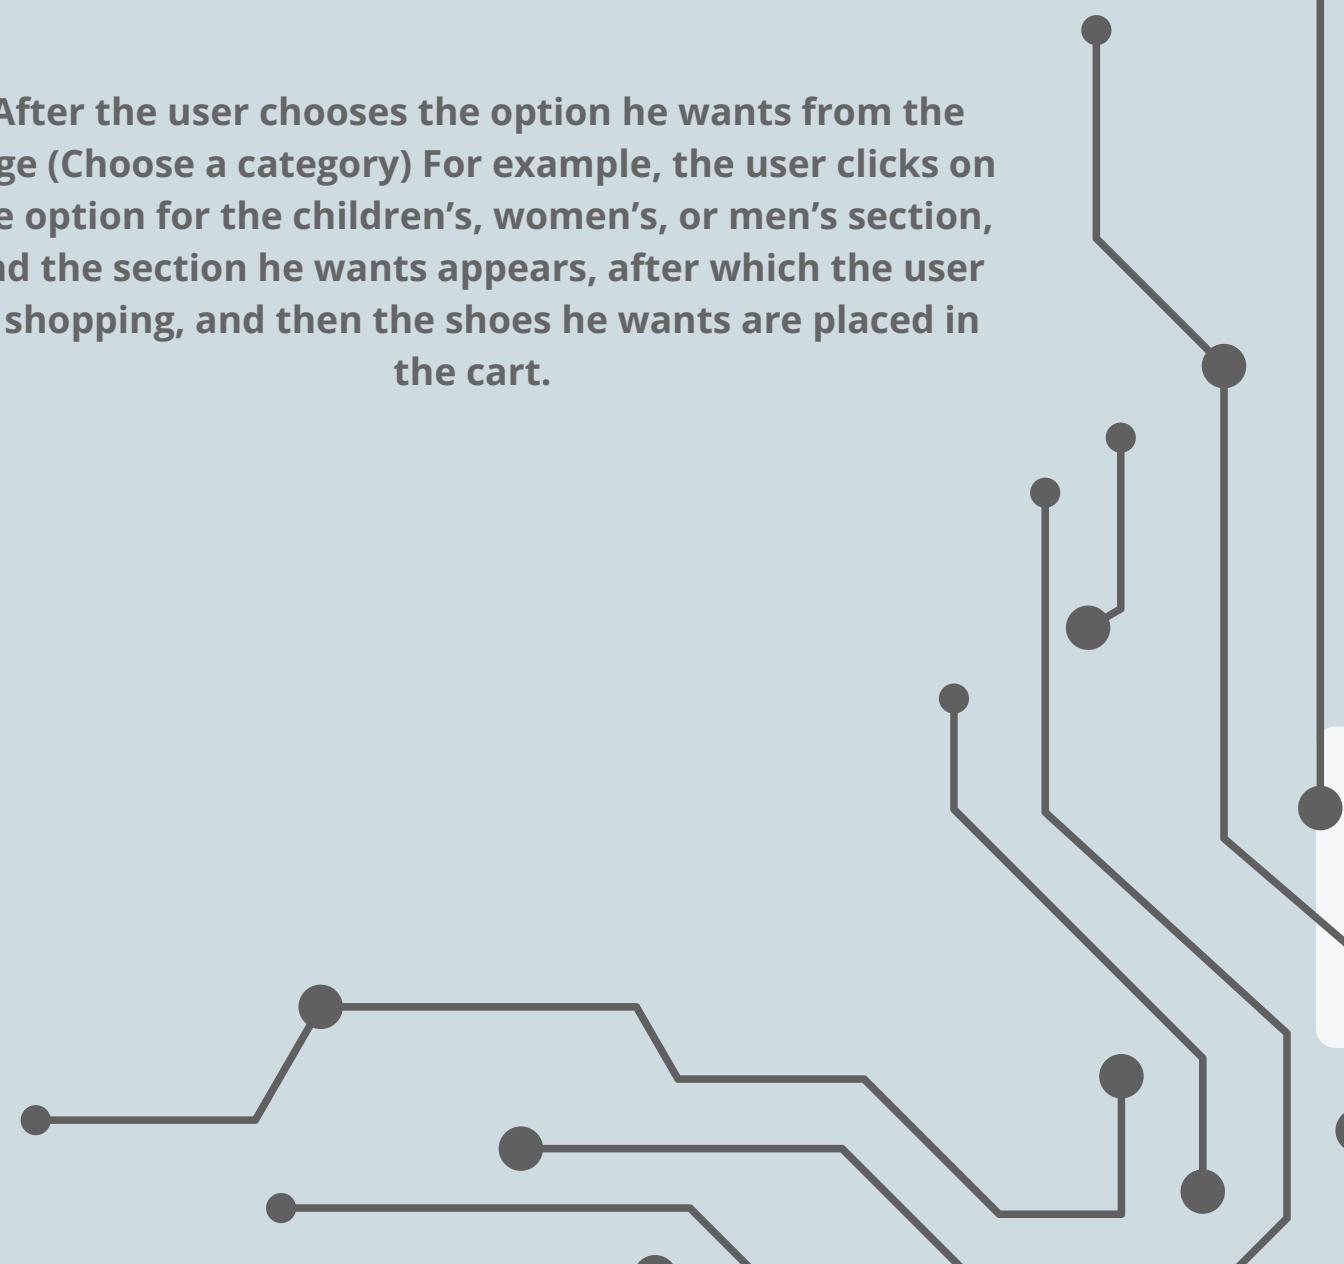

Here is the second option (Choose a category) from the main page. On this page, several options appear, so the user chooses what he wants to buy.

Menu Display

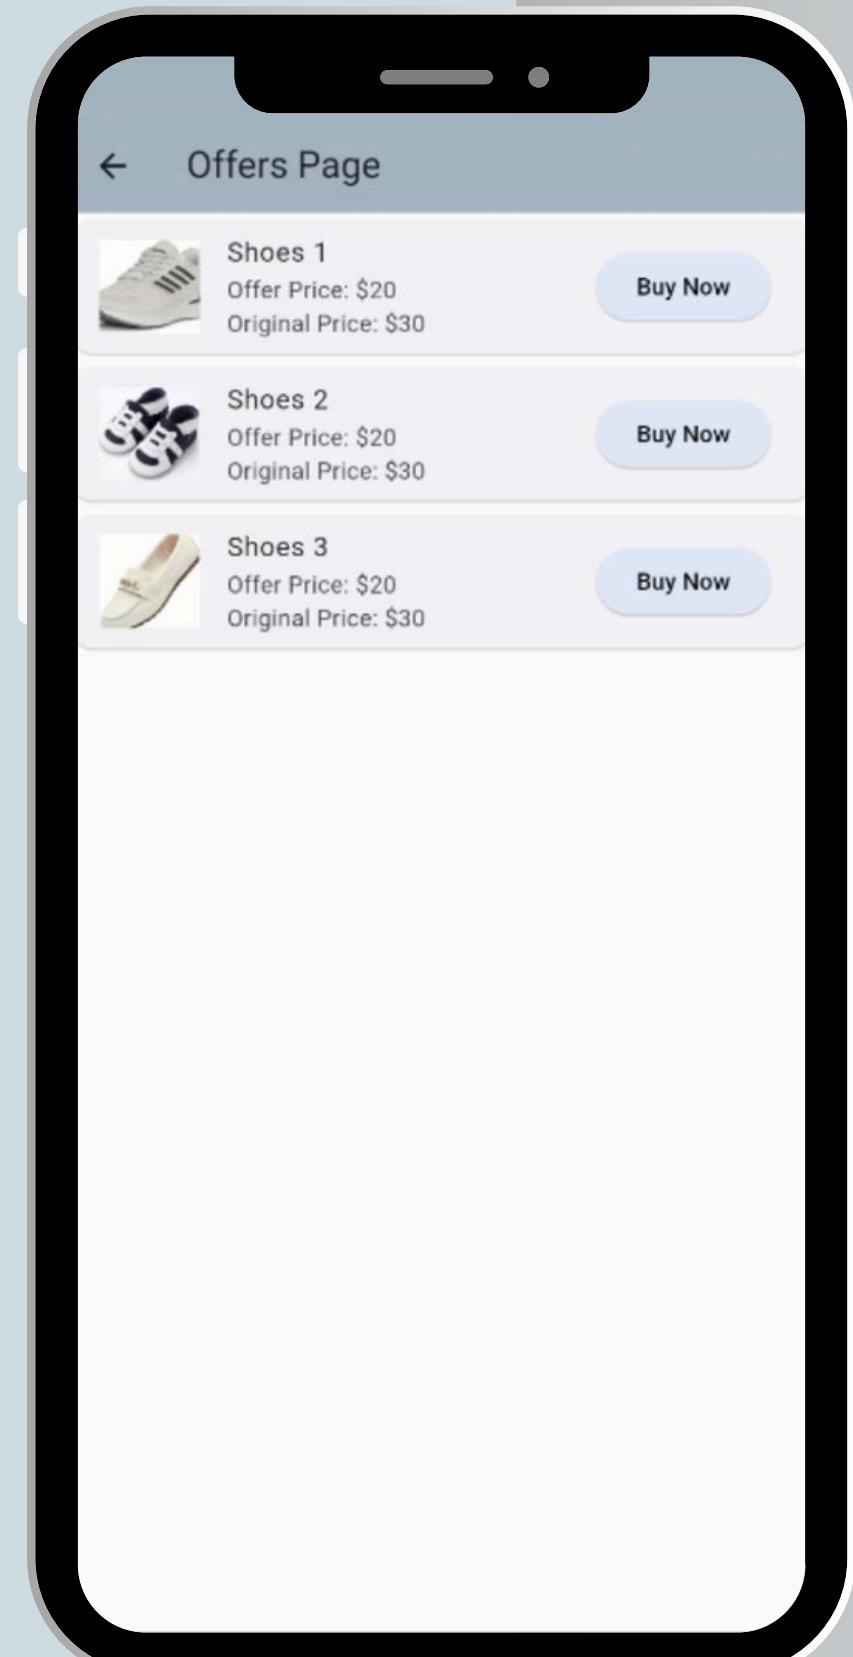

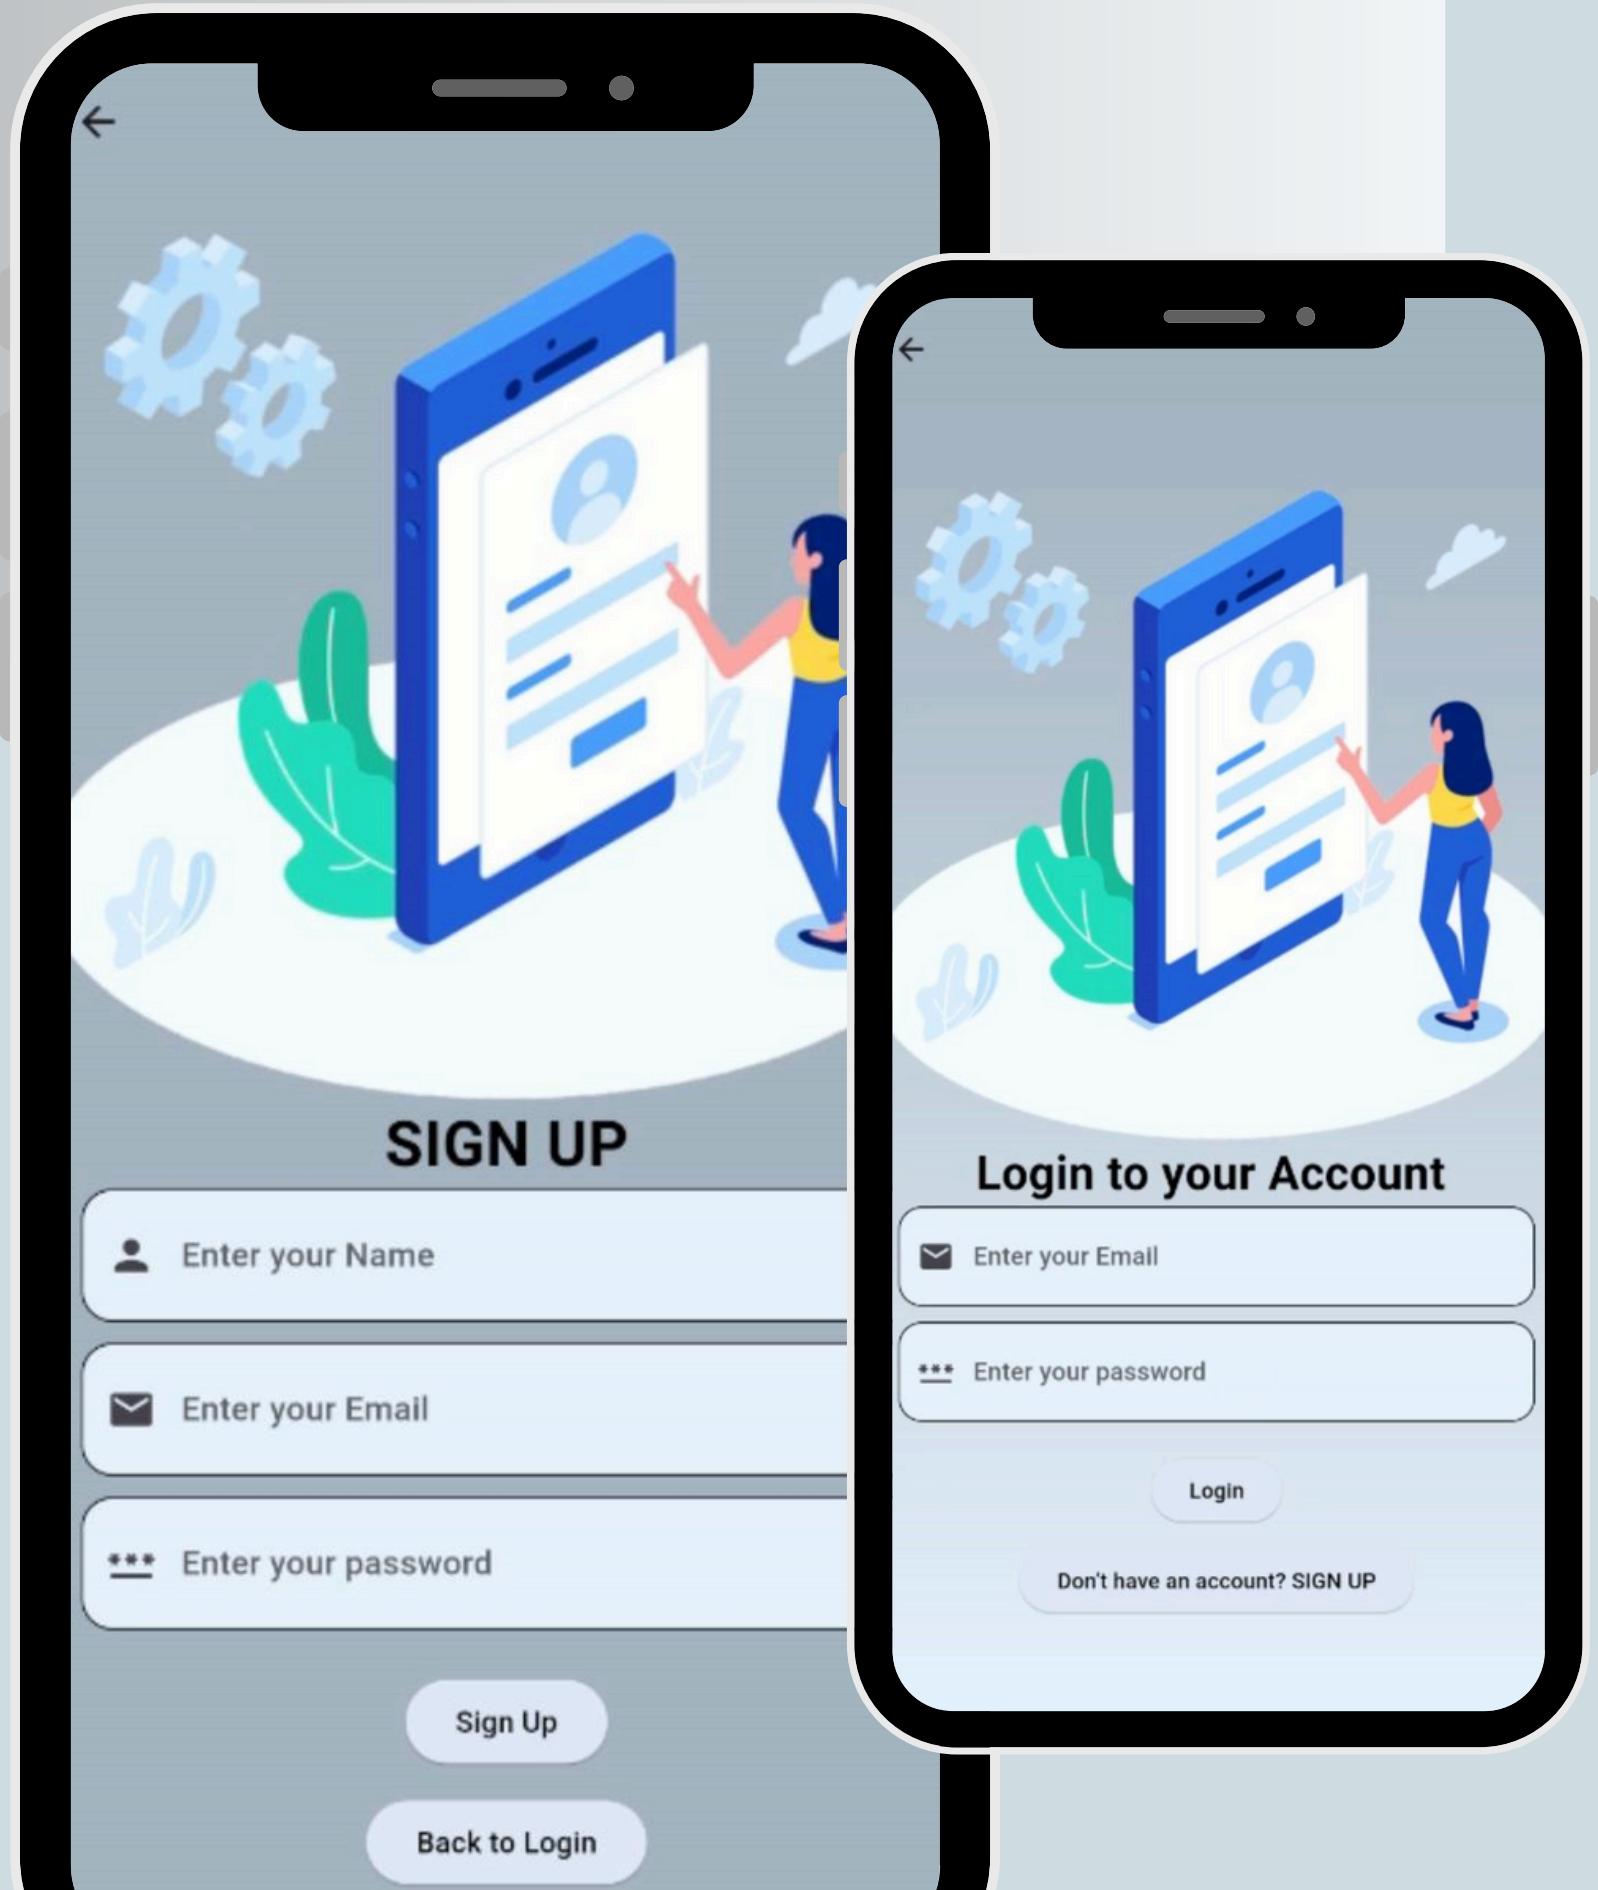

After the user chooses the option he wants from the page (Choose a category) For example, the user clicks on the option for the children's, women's, or men's section, and the section he wants appears, after which the user is shopping, and then the shoes he wants are placed in the cart.

Here the user appears on the home page with the option (Offers) and then the discounted list of shoes appears.

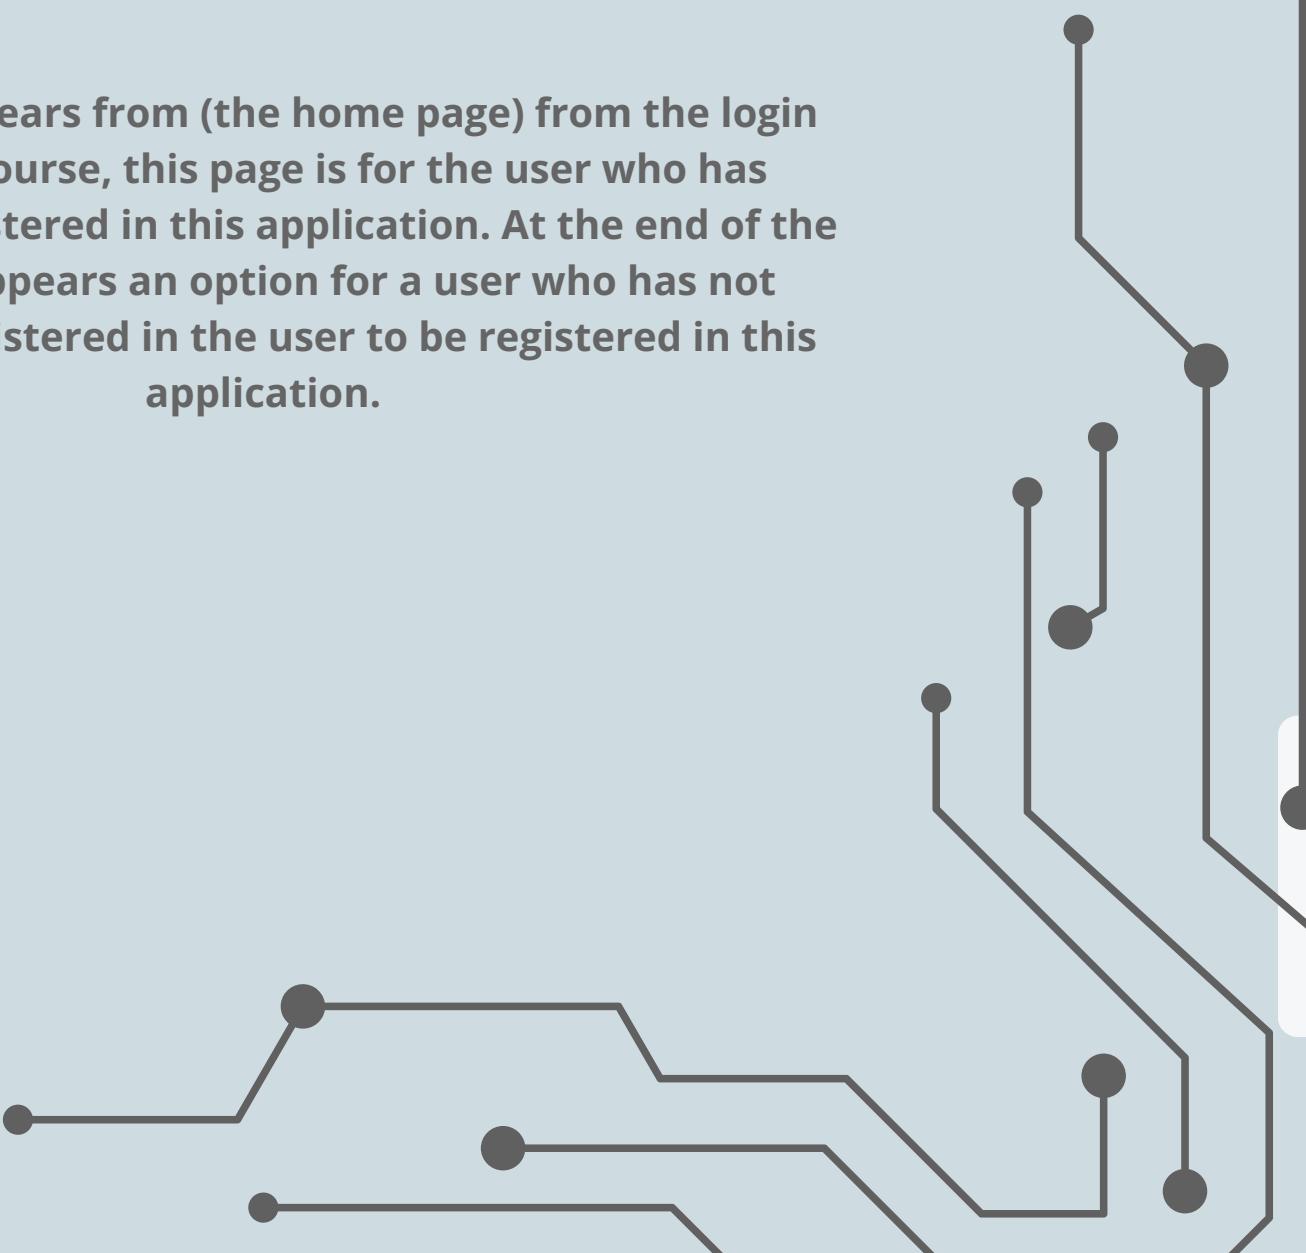

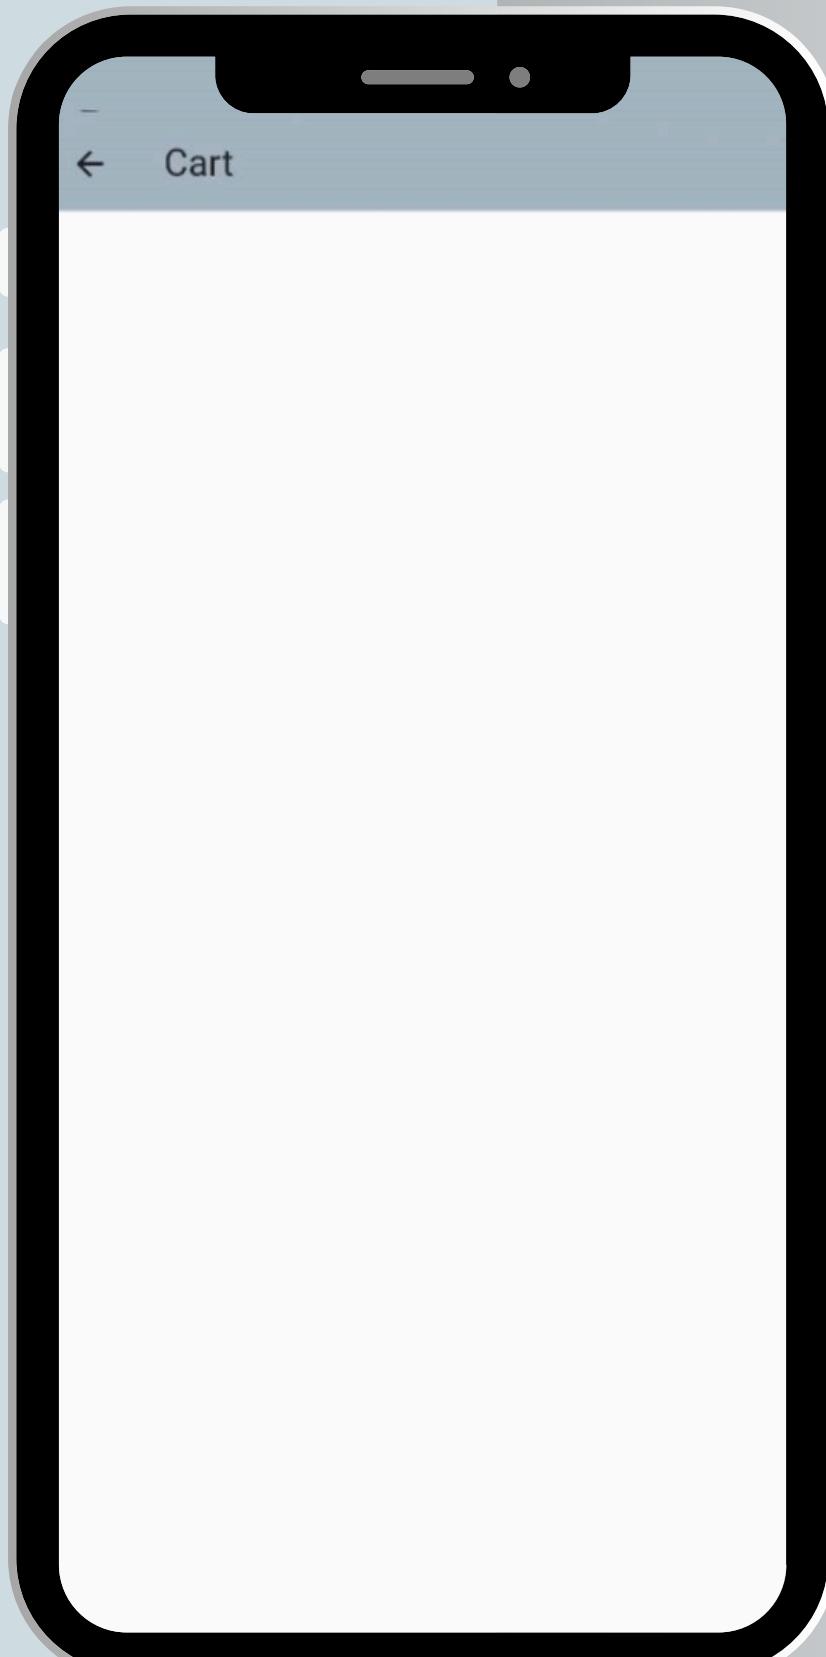

Register

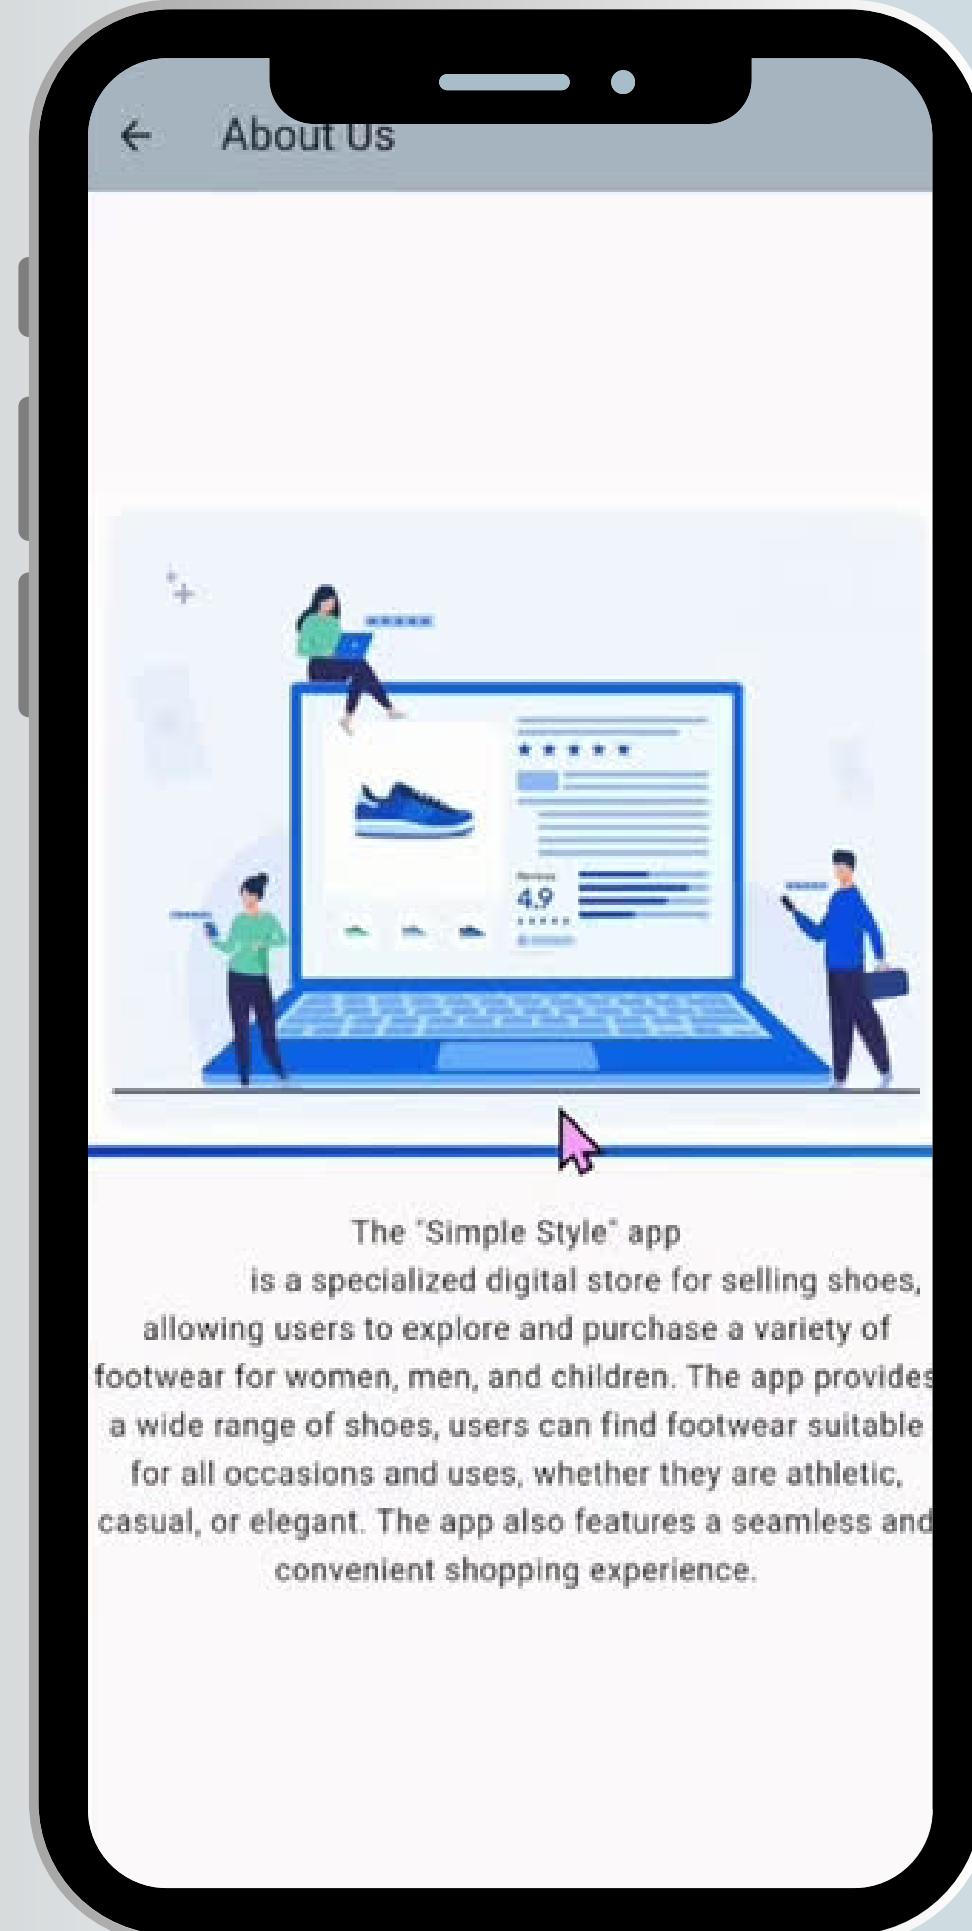

login page appears from (the home page) from the login option. Of course, this page is for the user who has previously registered in this application. At the end of the page here appears an option for a user who has not previously registered in the user to be registered in this application.

On this page (the shopping cart) appears from the main page. This is a page that shows the purchases of the user who wants to purchase them.

Application Performance

Thank You
